## New Keeganian Encryption Tech?

KLW has publicly revealed their new encryption technology, Keeganian Crypt V2. This preceeds the release of Keeganian Crypt V1, a message encryption method that still has not been cracked by the public, debuted during its significant usage in the Keeglandian Nuclear Crisis.

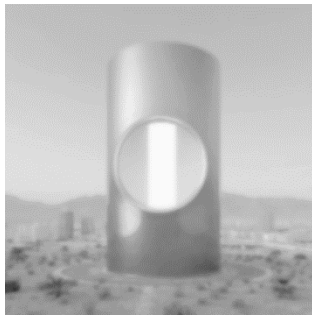

According to top Keeganian scientists, this encryption tech is “the most high tech to date, the world's top cryptographers have been unable to crack it even using their most advanced brute-force methods even when given the decryption key”.

## The Great Keeganium Reactor Has Finished Construction

Harnessing the power of the 150<sup>th</sup> atomic element, Keeganium, the CDAC Science department has constructed a self-sustaining reactor producing twice the yearly global energy consumption per month. This is 1,160 Terajoules or 38321 NMhs<sup>2</sup>Q<sup>-2</sup> of energy.

This makes the standard of living in the Keeganian colonies and mainland the highest in all the world due to the harnessing of this element for all electronic and battery components. Technology that can use these properties are various components with Keeganium power cells such as KeegPhones, Keegan Cars (now electric but with 21000 horsepower output), and any other devices. Bills no longer require payment for energy, heating, cooling, and all appliances. Additionally, the great Keeganium Reactor is a wireless charger for all power cells, and to fully charge anything, the power cell must be within 400hs from the reactor. Everything is now a wirelessly operated machine with this new creation.

Patents by Nicklas Hooton and Jacob DeMoss describe the reactor as a cylindrical white-glowing arc chamber with a height of 16hs and a diameter of 7hs.

## \*\*\*Keegan Quote of the Issue\*\*\*

“Simplicity is the ultimate sophistication”- Keegan Sanderson, Art of Evil

## Has Tsar Keegan Reached “Evilightenment”?

Tsar Keegan done fell over when he realized how evil his idea was, I forgot the idea tho Budha

## New Study on Keeganium States that the Radiation “is good for health.”

Scientists at the CDAC in Jacobopolis have released a study to the public on the beta positive decay that Keeganium undergoes. While the half-life of this element is 300 billion years or 4321518397.98 Q, the positrons are ejected from the atoms at such a frequency that not only kills cancer, but removes the need to sleep, enhances muscular performance, is hypoallergenic, cures lactose intolerance and other food allergies, as well as gets rid of Athlete’s foot. Scientist Thomas Barkan states “Other effects of the positron ejection are being studied as we speak. We currently theorize the element can be consumed to take these benefits on the go.” “Such an element seems too good to be true.” This was an idea from ex-Keeganian scientific theorist Bart Monroe when he said “I ain’t doing nun’ of that Keegan element stuff.” He is currently banished from the regime after inspection by the KSLC and KLW.

## “Keeglandian Halloween” EP Debut Has Kanderson Fans Going Wild!

Kanderson’s release of a Halloween themed EP branches the contact from the Keegan Regime out to other foreign holidays. While Halloween is not officially recognized by the CDAC, the concept is still practiced domestically with no restrictions from the tsar or other government institutions.

A review from Keeganian singer-songwriter, Adam:

“The songs released on Halloween were absolutely fire man like it was really cool. I personally liked Evil Machine as I was the lead singer with that insane beat from NickMusicMedia. I can't wait for everyone from all corners of the world to hear the full album when it is released it'll be insane. Lowkey want it to release now so the next album can start being worked on (Hint: It'll be eviler than ever). Anyways subscribe to Kanderson and listen to Adam Explains series thank you.”

## Keeganian Exile Zachary Robinson Plots Next Attack

Transcripts from the 25<sup>th</sup> of October at 11am presented further information on the opposition of Zachary Robinson towards the Keeganian Republic. Quote fragments while Zachary himself was held in the USA-Keeganian Embassy, the IAM, present the new intentions of terrorism. News of the reactor was leaked to Zach, and he asked questions about its stability and capability to critically react or explode. While the reactor

is not indestructible, the CDAC ensures that the reactor is perfectly stable and Keeganium has not yet been able to go critical in its non-ionized form on which the reactor is run. The RKAF ensures that the national security defense force and the KPF will be deployed for a 5-week defense campaign to avoid attacks.
